

# Blue Ox<sup>®</sup> Baseplates

LIMITED LIFETIME WARRANTY!

Great Tow. Less Show.

Choosing Blue Ox is having a baseplate customer-made for your vehicle. Our baseplates are easy on your suspension and even easier on the eye. We've designed them with hidden reinforcement. We don't offer a one-size-fits-all support system, but rather a system that's shock absorbing and integrated into the individual bumper frame or unibody with the bumper design of your vehicle. Our philosophy is to let the baseplate torsion, or flex, similar to receiver hitches allowing the baseplate to absorb the forces of towing rather than rigidly transferring the forces to the frame of the vehicle. It's just like having a baseplate customer-made -- only faster.

Competitive models have an exposed cross support beam that protrudes from the bumper. That method increases the weight you're carrying, takes longer to hook up and also exposes the baseplate to potential damage from curbs. As the photos below indicate, our baseplates don't detract from your vehicle's appearance.

## Removable Tabs. Added Good Looks.

Removable tabs further enhance the aesthetics of Blue Ox baseplates made for a variety of popular vehicles,\* including the most recent models from Saturn, Jeep, Acura, Honda, Chevy, GMC, Mazda, Nissan, BMW, Buick, Cadillac, Pontiac, Subaru and Toyota, as well as the Oldsmobile Bravada, the Suzuki Vitara, and the VW Golf, Jetta and Beetle.

\* For your specific automobile, see the application guide. All Blue Ox baseplates come with a limited lifetime warranty.
