

Mounting Brackets

Hidden Mounting Brackets

ROADMASTER 'XL', 'MX' and 'EZ' series mounting brackets have detachable extensions which are easily removed when the car is not being towed.

No unsightly steel hanging off the front of your car!

Every design is subjected to computer-simulated stress testing, to ensure structural integrity and reliability. 'XL' and 'EZ Twistlock' series brackets are for both car- and motorhome-mounted tow bars; 'MX' series brackets are for motorhome-mounted tow bars only. 'EZ Twistlock' bracket extensions are rotated on and off to connect or disconnect them; 'XL' and 'MX' extensions are attached with hitch pins and clips.

- They're virtually invisible – improved aesthetics.
- Easy to install – ROADMASTER brackets use existing attachment points on the vehicle's undercarriage.
- Most install through the grille – no scraping brackets in dips or curbs.
- Easy to remove – converts from towed car to road car in seconds!

XL™ Bracket

EZ Twistlock™ Bracket

EZ Twistlock bracket shown w/Quick-Disconnects

MX™ Bracket
